For 40 years, Understanding Our Differences has helped transform schools and communities into places where differences are appreciated and valued.

We achieve this through our innovative curriculum that:

- Teaches understanding, awareness and inclusion of people of all abilities
- Promotes anti-bullying and respect for all students
- Enables students to see the whole person and better understand the disability
- Covers a broad range of disabilities and chronic medical conditions

Now we are working to expand our impact, and extend our reach, with a digital product that blends hands-on learning with cutting-edge technology.

**Targeted for an elementary school audience, our digital product will include:**

- Videos
- Animations
- Interactive software
- Speaker webcast options
- Downloadable off-line activities
- Communication tools
- Content and learning management tools
- Pre- and post-assessments

**Understanding Our Differences needs your support now to achieve our vision.**
Learn more and see how you can contribute to making inclusive communities a reality for every child.
